

Abstract

## Soap Dispenser with Reservoir for Bubble Wand

5        A liquid soap dispensing container comprising a  
vessel having at least one aperture; a means for  
dispensing the liquid soap from the vessel connected to  
the aperture; and at least one reservoir formed in,  
provided on, or affixed to the vessel for retaining a  
10       quantity of the liquid soap, the at least one reservoir  
having dimensions able to receive a bubble wand.
